## RDSB Elementary Volleyball Starting Lineup Card Reference Page

The starting lineup card is used to set the starting positions for teams and to allow the rotation order of the players to be tracked. This is not meant to create more work for coaches but is deemed a necessary step to ensure the quality of the game is maintained at all times by all participants.

On the RDSB lineup cards please note the following:

- 1) The numbers 1 to 6 are on the sheet as a reference for the court position of the players.
- 2) The sheets are to be ripped in half prior to the match. One half is given to the score table/ref and the coach keeps the other half as a reference.
- 3) Team name must be included as the referee will have 2 sheets (i.e. one from each team). You are able to complete your school name on the PDF file before printing if you choose. There will be lineup cards available at the tournaments.
- 4) Other lineup cards may be used.
- 5) Teams rotating into court position 6 must use “Rotating Lineup cards”
- 6) ONLY player numbers are required on these cards.
- 7) Example of RDSB Elementary Volleyball Lineup Card:
